IRON MAID 15-0-0

IRON SUPPLEMENT

Iron Maid is a superior iron compound for use on fairways, roughs, and sports fields. Regular applications of *Iron Maid* will ensure linear availability of iron throughout the growing season. Benefits include:

- Improved Color and Growth
- Extended Greening
- Quick Availability
- Low Phytotoxicity

Iron Maid is not a complete nutrient package and therefore should be used in conjunction with a sound nutrient program. *Iron Maid* is not intended for use on golf greens.

Iron Maid is a complexed iron source unlike other iron products. Complexing allows *Iron Maid* rates to be lower as the plant is more receptive which increases uptake and efficiency.

PROFESSIONAL USE GUIDELINES

②

NUTRIENT CONTENT

Total Nitrogen (N)	15.00%
15.00% Urea Nitrogen	
Sulfur (S)	1.20%
Iron (Fe)	6.00%

Derived from urea and ferrous sulfate heptahydrate.

Net Weight: 10.55 lb/gal (1.264 kg/L)

Rate of Application: For iron deficient situations, 3-6 fl oz / 1000 sq ft (10-20 L/ha). For maintenance applications, 1.5-3.0 fl oz / 1000 sq ft (5-10 L /ha) every 2-3 weeks.
