PERVADE PELLETS

WATER INFILTRATION PELLETS

Pervade Pellets are a portable soil penetrant designed to assist managers in areas where water penetration is minimized including:

- Berms
- Undulating Greens
- Roughs
- Sloping Terrain

Pervade Pellets provide effective moisture management by improving:

- Infiltration
- Dispersion
- Uniform Distribution
- Hydrophobic Soils
- Hot Spots
- Dew
- Flushing
- Perching

Pervade Pellets' proprietary formulation promotes quicker, longer lasting moisture penetration properties to soil than traditional alcohol and soap base wetting agents.

Pervade Pellets are non-burning and are compatible with treated water supplies. Unlike alcohol and phenol wetting agents, *Pervade Pellets* are 100% biodegradable.

PROFESSIONAL USE GUIDELINES

ACTIVE INGREDIENTS

Proprietary Blend of Di-sulfosuccinate Soil Surfactants,
 Polymers, and Polyhydroxy Acids 82.0%
 Buffers, Couplers, Stabilizers, and Solidifying Agents
 Ineffective as Adjuvants 18.0%

Net Weight: 12 x 0.5 lb (227 g) pellets

Rate of Application: Pervade Pellets will dissolve at different rates depending on water pressure, chemistry, temperature, and flow rate.
