RAIDER TG

SUPERIOR ABSORPTION TECHNOLOGY

Raider TG is a unique spray adjuvant designed to improve plant uptake of foliar applied pesticides and nutrients and other materials designed for systemic absorption by plants. **Raider TG** is formulated with **Floratine's** patented agent to promote:

- Quick Absorption
- Wider Spray Windows
- Lower Chemical Concentrations

The key to **Raider TG** performance is by buffering the plants intake mechanisms. **Raider TG** assures maximum efficiency of applied materials, particularly in marginal weather conditions and with large molecule chemicals.

What users are saying about **Raider TG**:

"Raider TG is more than worth the money for reduced plant stress alone."

"It is comforting to know that when you spray, the weeds are going to die."

PROFESSIONAL USE GUIDELINES

9

Tank mix **Raider TG** with any spray material designed to be absorbed by plants. Generally, **Raider TG** can be used with any type of equipment, ground or air, that delivers the correct amount of material to the target area. **Raider TG** should be applied at the specific rate of 0.5 fl oz / 1000 sq ft (1.5 L/ha) regardless of the total spray volume to be applied.
